Wesign
The Future

Digital signature portal for remote signing

Easily and quickly signing documents online for customers, suppliers, and employees.

Wesign is a remote digital signature solution allowing you to sign any document, at any time, from any device: computer or cellphone, tablet or desktop.

Wesign simplifies every approval, effortlessly navigating between departments and signatures, and **'gets the job done'** faster.

Remote signatures with Wesign

Easily sign anywhere on any device

Agile Solution

With Wesign you can sign documents digitally anytime, using any device: desktop computer, laptop, smartphone, or tablet

TAILOR MADE Solution

A flexible pricing model allows everyone to customize a convenient and affordable plan for themselves: self-employed individuals, small businesses, large companies, startups and organizations

Cloud Solution

A solution that saves significant resources and unnecessary headaches of additional software installations for storage and information security. Except your signed documents, of course
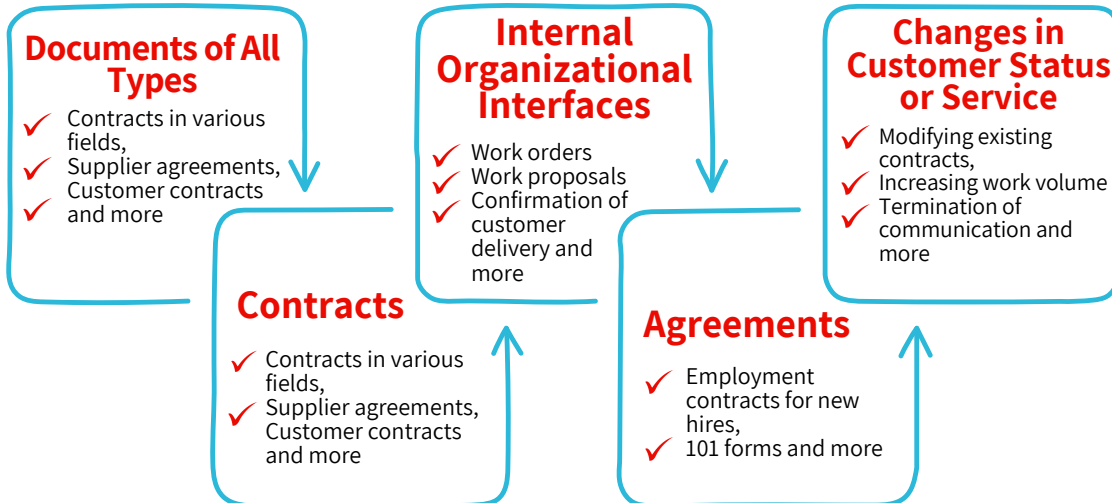

Secure Solution

You can be rest-assured that our team takes all necessary steps for your security. Your data is encrypted, ensuring that signed documents are visible only to you

Refine customer experience and service

Command and Control
Better command and control in the flow of organizational data

More than Just a Signature

Sending a Document for signature:

- Send documents for signature via link, email, SMS, or any other method of your choice
- Use online signature – remotely reviewing and completing the document with the signer
- System supports both individual and multiple signature processes with a defined signing order
- Offers the creation of reusable document templates
- Add notes to the document before sending for signature
- Consolidates multiple files into a single PDF for signature or as a permanent template
- Upload multiple files for signature
- Facilitates signatures on corporate tablets with document access
- Adapts to a variety of document formats, including PDF, Word-MS, JPEG, PNG, XLS, and C

Document Editing:

- Add the Drag & Drop method to insert edit and signature fields.
- Duplicate editing and signature fields effortlessly
- Customize branding – implementing a company logo and brand taglines.
- Attach additional files to the document

Document Signing:

- Sign documents using three methods – drawing, a graphic signature, or initials
- Use a smart card or a token for certified signatures
- Save signatures for future use
- Comment on the document, both signer and sender

More than Just a Signature

Security:
- Use two-step verification links for signers
- Implement face recognition for a better authentication process before signing

Document Management and Tracking:
- Manage and track document status
- Receive email notifications upon document signing or viewing by recipients
- Send automatic signature reminders to unsigned document recipients

Additional Options:
- Enable API integration by interfacing with internal systems
- Attribute and send files automatically to designated fields and recipients
- Circulate documents, like Form 101, to all employees
- Send a single document to a large group with a single click
- Attach search tags to contacts
- Use a dedicated support website with a user guide and training videos

Comsign's Signature - Your Security

Comsign is a certifying agency according to EDIAS, the strictest and most advanced European standard in the world.
That means that ComSign digital certificates are valid across Europe.

Our Clients
